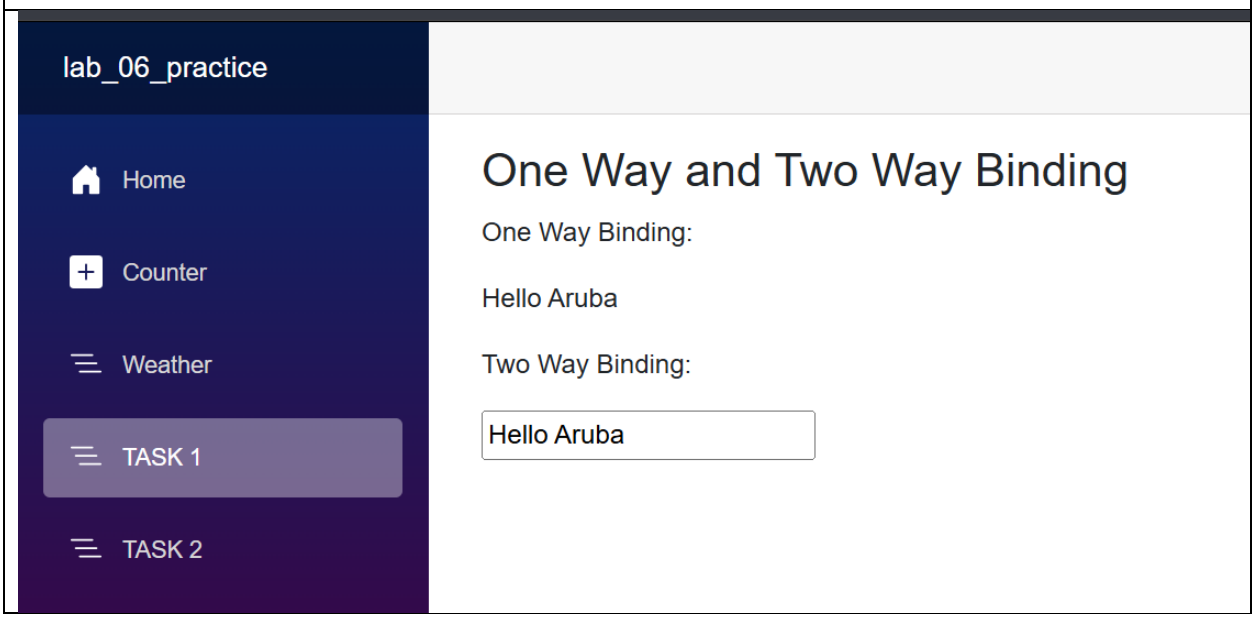
@code {
    private string message = "Hello Blazor";
}
```



TASK 2

```
@page "/counter"
@rendermode InteractiveServer

<PageTitle>Counter</PageTitle>

<h1>Counter</h1>

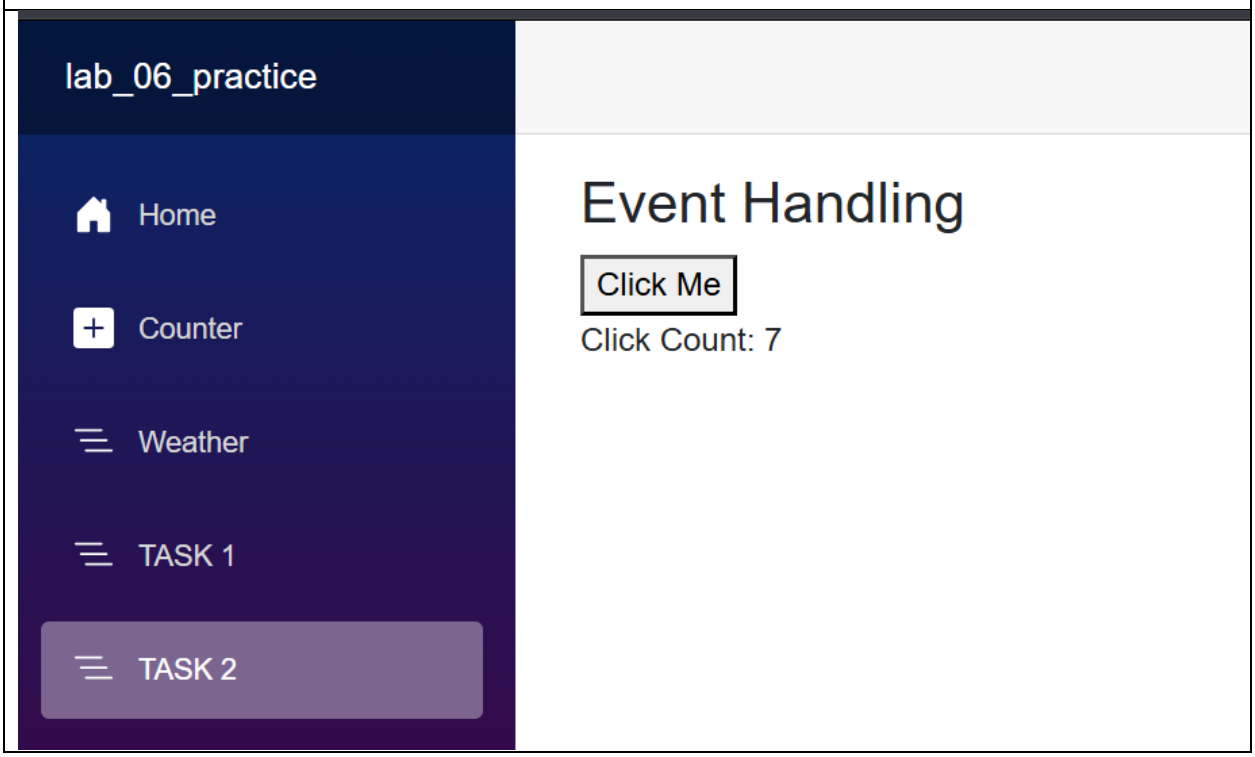
<p role="status">Current count: @currentCount</p>

<button class="btn btn-primary" @onclick="IncrementCount">Click me</button>

@code {
    private int currentCount = 0;

    private void IncrementCount()
    {
        currentCount++;
    }
```

```
}
```



TASK 3

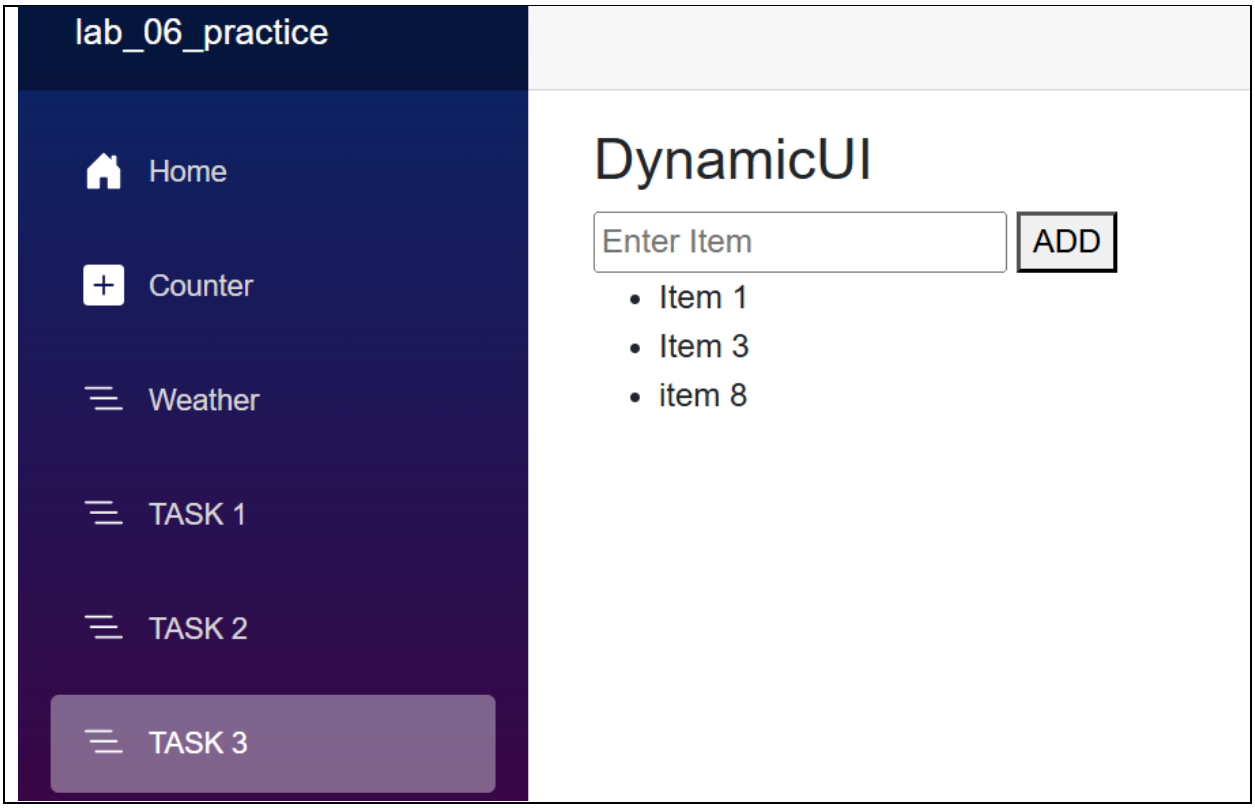
```
@page "/DynamicUI"
@rendermode InteractiveServer
<h3>DynamicUI</h3>

<input @bind="newItem" placeholder="Enter Item"/>
<button @onclick="AddItem">ADD</button>

<ul>
    @foreach (var item in items)
    {
        <li>@item</li>
    }

</ul>
@code {
    private string newItem = "";
    private List<string> items = new List<string>();

    private void AddItem()
    {
        if(!string.IsNullOrEmpty(newItem))
        {
            items.Add(newItem);
            newItem = "";
        }
    }
}
```



LAB TASK 1

```
@page "/UserForm"
@rendermode InteractiveServer

<h3>User Form</h3>

<div>
    <label>Name:</label>
    <input @bind="nameInput" placeholder="Enter your name" />

    <label>Age:</label>
    <input @bind="ageInput" type="number" placeholder="Enter your age" />

    <label>Email:</label>
    <input @bind="emailInput" type="email" placeholder="Enter your email" />
</div>

<p>
    <button @onclick="DisplayData">Submit</button>
</p>

@if (isDataSubmitted)
{
    <h4>Entered Details:</h4>
    <p><strong>Name:</strong> @name</p>
    <p><strong>Age:</strong> @age</p>
    <p><strong>Email:</strong> @email</p>
```

```
}
